Managing Agile Programmes

Wisereach Masterclass - Synopsis

Managing Agile Programmes

Session content

1 why managing agile is different

We look at the difference between traditional and agile work and some of the challenges introduced.

2 your programme management style

What is your programme management style and how do you think it works in an agile context?

3 introducing some new techniques

We explore some different ways to engage with Agile teams and how these can help nurture agility.

4 summary and review

Finally we will review the topics and explore ways in which you can apply some of the new techniques you have learnt.

Session style

We aim to make this masterclass informative and interactive. It is not intended to be an instructional course, but more a sharing of ideas and techniques that delegates can reflect upon and discuss.

We will create an environment where there is time to think about how different techniques can be used to manage agile delivery in your own programme.

We hope that you will find it both informative and enjoyable.
